

WHAT MAKES THE PIUSI HEAVY DUTY HOSE REEL

HEAVY DUTY?

ADJUSTABLE ARM BRACKETS

The reel can be easily and safely mounted in various positions, as shown above, without any impact on its functionality.

FOUR-WAY ROLLERS

Automatic spring rewind hose reel with four way rollers to guide your hose in any position that you decide, without excessive wear on the hose.

FINGER GUARD

Goes on both sides of the reel to prevent users from trapping their fingers in the ratchet system.

ENHANCED STEEL INLET

This makes the reel a more robust system, improving performance and reliability – ideal for heavy-duty applications.

STURDY. STEEL STRUCTURE

Extra bends in the main column provide additional strength and support to reel, preventing it from being pulled over when the hose is extended.
