#### Timeline of Events:

#### Areas of Interest:

#### Background Information:

- Continuous level indicator for real-time contents viewing
- Digital display in a choice of %, litres/gallons or mm/inches
- Accuracy of +/-1% on cylindrical and rectangular tank shapes
- Visual LED for low and high level status alerts
- Two configurable relays for status alerts using other equipment
- 4-20ma version for use with a building management system
- Suitable for use with diesel, water, oil and AdBlue

#### Further Details:

Even as the UK agent we've been pronouncing "Ocio" wrong for 18 years! The true Italian pronunciation is Otch-ee-oh, but we're guilty of saying how we see it and calling it the Ock-ee-oh. As a result that's what it's become known as in the UK.
